Gorakhpur, India · heyitspalakjaiswal24@gmail.com · +91 9450081431 · GitHub · LinkedIn · Portfolio

EDUCATION

National Institute of Technology (NIT) Patna	Patna, India
B.Tech., Computer Science and Engineering CGPA: 8.15	Aug 2023 - Present
G N National Public School	Gorakhpur, India
Senior Secondary School Percentage: 93.4	2022
Little Flower School	Gorakhpur, India
Secondary School Percentage: 95.6	2020

PROJECTS

API Gateway & Analytics Platform [\[Link\]](#)

- Engineered a production-grade API Gateway in Spring Boot with dynamic route resolution, JWT + API Key dual-auth middleware, and Redis sliding-window rate limiting (429 + Retry-After) — containerized 4 microservices via Docker Compose with full Swagger/OpenAPI documentation on 10+ endpoints.
- Integrated a custom Go database engine (B+ tree, WAL, hand-written SQL parser) as an HTTP analytics microservice — asynchronously capturing per-request latency, user identity, and status codes, flagging slow requests exceeding 500ms with no impact on gateway throughput.
- Delivered a React admin dashboard with 30s auto-refresh for real-time analytics charts, route CRUD, API key lifecycle management, and rate limit configuration — all powered by the custom Go DB engine.
- Technologies: Spring Boot, Go, Redis, PostgreSQL, React, Docker**

TrackMyMoney – Full-Stack Personal Finance Management System [\[Link\]](#)

- Designed and shipped 15+ REST API endpoints spanning 10+ JPA entities (income, expense, category, dashboard) with Spring Security JWT auth — zero unauthenticated endpoints exposed.
- Implemented SMTP email verification with tokenized activation links, blocking unverified users from API access entirely and enabling automated account activation.
- Developed an Excel export pipeline using Apache POI for one-click financial report generation on any custom date range, covering full income and expense history.
- Technologies: Spring Boot, Spring Security (JWT), Java, React, MySQL**

MockMate – AI Mock Interview Platform [\[Link\]](#)

- Built a real-time AI interview platform with live voice interaction and transcription via VAPI, supporting end-to-end interview sessions without manual intervention.
- Engineered an automated scoring pipeline using Gemini API evaluating candidates on 5 dimensions — reducing feedback turnaround from manual hours to under 10 seconds.
- Enforced Firestore security rules for strict per-user data isolation on interview sessions and feedback records, ensuring zero cross-user data leakage.
- Technologies: Next.js, TypeScript, Firebase, Gemini AI, VAPI**

TECHNICAL SKILLS

Programming Languages:	Java, Go, C, Python, JavaScript, TypeScript
Backend:	Spring Boot, Spring Security (JWT), Node.js, Express.js
Frontend:	React, Next.js
Databases:	MySQL, PostgreSQL, MongoDB, Redis, Firebase (Firestore)
Tools & Platforms:	Git, Docker, Postman, Swagger/OpenAPI, IntelliJ IDEA
CS Fundamentals:	DSA, OOP, OS, DBMS, Distributed Systems

EXPERIENCE

Web Developer | THINK INDIA CLUB, NITP Dec 2023 - Present

- Developed and deployed an event management platform handling online registration, announcements, and participant tracking for club events.

UI/UX Designer | DesCo, NITP Nov 2023 - Present

- Designed wireframes and prototypes adopted by 200+ students, establishing design standards for the club.

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

- Solved 500+ algorithm and data-structure problems on LeetCode with focus on medium/hard DSA.
- Achieved 3-Star rating on CodeChef through consistent competitive programming contest participation.
- Flipkart Grid 7.0: Semi-Finalist** — top competitive engineering challenge by Flipkart. [\[View\]](#)
